The CAM FIT™ Retention System utilizes Cam Lock sliders for one-handed adjustment and secure fit. Adjustment straps and a MIL-DTL-32067 leather chin cup have been designed for a close, comfortable fit to the wearer's face, while the asymmetric design keeps the buckle tucked smoothly along the jaw line.

- Boa® Fit System stabilizes the weight of the helmet by distributing light, even pressure around the head
- Left eye dominant (LED) option also available
- 4" (100 mm) Chinstrap Extender available (sold separately) to lengthen the chinstrap to accommodate a gas mask
- Included hardware based on shell type; hardware kits available for standard, ECH and ARC Rail fitted helmets
- Included hardware may not be compatible with side accessory rail systems; in these cases use original hardware or contact Team Wendy for hardware options
